

Feature	Jupiter Melody	Orion	Athena
Electrodes (produce negatively charged reduced ions = antioxidant potential)	5 x titanium platinum-plated electrodes deliver powerful reduced ions . Not mesh-plated	5 x MESH PLATED titanium platinum electrodes deliver strong reduced ions, even at lower alkaline levels.	5 x MESH PLATED titanium platinum electrodes deliver maximum reduced ions, even at lower alkaline levels.
Filter	Single, patented Bio-stone carbon-bloc filter, 0.1 or 0.01 micron (kidney dialysis fine filter level) options.	Single, patented Bio-stone carbon-bloc filter, 0.1 or super fine 0.01 micron options (kidney dialysis fine filter equivalent)	DUAL FILTRATION Single, patented Bio-stone carbon-bloc filter, 0.1 or 0.01 micron Plus, sediment pre-filter optimizes performance and life of machine.
Manual Control Option	No	No	Yes. This allows user to slow down flow rate, thereby maximizing ionization potential The very latest technology offers the absolute strongest delivery of negative ions
Cleaning mechanism	Efficient, "no-wait" automatic, self-cleaning mechanism protects life of electrodes.	State of the art, patented Double Action Reverse Cleaning (DARC) helps remove scale from electrodes. Excellent for hard water areas.	State of the art, patented Double Action Reverse Cleaning (DARC) helps remove scale from electrodes. Excellent for hard water areas.
Can be fitted under sink?	Yes	No	Yes
Consistency	Lower pH of input/municipal water will produce slightly lower alkaline levels. Low pressure of source water may also cause fluctuations.	Patented SOL valve and triple diaphragms deliver correct pH levels and pressure regardless of municipal source fluctuations.	Patented SOL valve and triple diaphragms deliver correct pH levels and pressure regardless of municipal source fluctuations.
Warranty	5 years	5 years	5 years
Price	\$1,395.00	\$1,795.00	\$2,095.00
